

TECHNOLOGY PLASTICS INC.

Bottoms Up

Saves you **TIME & MONEY**

www.technologyplastics.com

TPI recently had an installation demonstration for a large waste company in Texas salvaging 2-yard containers that had been taken out of service because of small holes in the bottoms. The cost to re-fabricate the 2-yard container is prohibited vs purchasing new containers.

TPI liners were installed, the containers were painted, decaled and ready to go back into service, where as just 24 hours prior they were headed to the scrap yard.

TPI guaranteed to save you time and money from the bottoms up.

Advantages

- Ease of Installation—15 minutes or less
- Can be Installed in the Field
- Impermeable & Resistant to Corrosive Agents
- Provides Secondary Containment
- Environmentally Sound
- Extremely Impact Resistant
- 100% Recycled
